Suggested Improvement / Room for Development	The activity encourages young children to explore freely and play in the area according to their own preferences, thereby learning knowledge from different domains. It is recommended to continue visiting Yaoxueyuan in the next school year.	Activities can present many challenges to young children, encouraging them to try solving problems on their own and fostering their ability to face difficulties with a positive attitude.	The activity helps young children learn about different animals, their needs, and the proper attitude toward treating animals. It aims to cultivate children's love, empathy, and sense of responsibility.

Suggested Improvement / Room for Development	Activities can stimulate young children's motor skills, allowing them to engage fully in physical exercise. It is recommended to continue holding this event next school year to provide children with diverse physical experiences.			By engaging children in experiential learning journeys, we ignite their curiosity and guide them to use their five senses to explore the connections between food, nature, and environmental protection. This allows young children to experience nature and joyfully learn healthy and eco-friendly eating habits.			The activity allows young children to learn about various precious aquatic insects and also enjoy the sight of fireflies glowing. Through a relaxed and joyful experience, children learn the importance of caring for the environment and cherishing natural resources!

Suggested Improvement / Room for Development	The activity allowed young children to learn more about the habits of China's national treasure—the giant panda. By observing the giant panda's living environment, they gained an understanding of the relationship between the physical characteristics of various animals in Sichuan and their habitats. The activity aligns well with the goal of helping children learn about China, and it is recommended to continue participating in it next school year.			Since this event took place during the summer and the camp had many outdoor areas, young children were more likely to experience discomfort due to the heat. It is recommended that if a similar event is held next time, it be scheduled in the fall.
